Cape Town (open to relocation)

ABOUT ME

I am a Full Stack Developer with 4.5 years of experience in the fintech industry, specializing in building web applications, internal tools, and business systems. I have extensive experience developing user-centric interfaces with Vue.js, JavaScript, Tailwind CSS, and Node.js, while collaborating across teams to deliver scalable solutions. My background includes translating complex business requirements and financial data into intuitive dashboards, automated workflows, and operational tools that improve efficiency and decision-making. I am passionate about using technology to solve business problems through software, process improvement, data, and automation.

EDUCATION

2014 - 2016

NORTHLINK COLLEGE | DIPLOMA IN SPORT FITNESS

A two-year diploma focused on high-performance coaching and sports management. Developed strong interpersonal skills and a disciplined work ethic, providing a solid professional foundation for my subsequent transition into the tech industry.

2019 - 2020

HYPERION DEVELOPMENT | WEB DEVELOPMENT CERTIFICATION

A project-based, intensive software development program focusing on the full development lifecycle. Developed core competencies in modern JavaScript frameworks, relational and non-relational databases, and RESTful API architecture. The program culminated in a series of capstone projects that demonstrated the ability to build production-ready applications from the ground up, leading directly to a career in the fintech sector.

WORK EXPERIENCE

2017 - 2021

HUSSAR GRILL | 5 STAR STEAKHOUSE

Progressed from floor service to head waiter and part-time manager in a high-volume premium environment. Mastered the ability to manage complex team workflows and maintain high quality standards under pressure. Developed elite communication and conflict-resolution skills, providing a strong foundation for collaborative, user-centric frontend development.

2021 - 2026
Retrenched

PROFINTECH | WEB DEVELOPER

Full Stack Developer with a proven track record of modernizing legacy systems and optimizing workflows. Co-led the high-performance migration of a legacy WordPress site to a decoupled Vue 2/Vuetify architecture with a secure, custom API-driven registration flow. Transitioned to lead developer for internal fintech tools, engineering Vue.js and Material UI dashboards while leveraging Google Apps Script and APIs to automate complex financial workflows, reducing manual processing time by 40%.

SKILLS
